

KANT Special Prize 2021

Announcing our call for:
Short Films / Video Clips of 60 to 90 Seconds
„The Special within the Ordinary“

Submission deadline: Friday, February 28th, 2021

.....

Working alone, or in small groups of students and filming with your Smartphone you should create a video clip of 60 to 90 seconds.

The theme of the video clip should be an incident or an observation that is representative of your everyday school life. It should be a scene that represents something special, or ordinary.

For example, in the evening or afternoon, you come home from school and someone asks: “Well, how was it today?” Often the answer is uninspired: “Oh, it was nothing special. On other days, however, you feel noticeably more inspired: “Something special happened today that I need to share!” Your video clip could present either of these experiences. Remember, however, it needs to be something you experienced in class, on the playground, during breaktime, or even at lunch that is worth sharing. It should represent a digital “still life” that shows something special within the ordinary about the school building (inside or outside), or the about or the immediate school environment. It could also take the form of a “narrative.”

What is important? What is valued?

- **Your video should be a scene from your „everyday life“ at school**
- **Make it „eye-catching:“ images should be clear and crisp; give it rhythm; make it captivating; edit it well.**
- **Feel free to include text, dialogue, or music.**

Your short film/video clip should be saved as an mp4 file (the name of the file should be the title of your film/clip and placed on a USB stick and submitted to your school office together with the form on the reverse (USB sticks are available in the office).
